free survival compared with placebo plus endocrine therapy, and had a manageable safety profile in patients with premenopausal, HR-positive, HER2-negative, advanced breast cancer. The combination could represent a new first-line treatment option for these patients.

Adjuvant endocrine therapy for early breast cancer: a ...

1. INTRODUCTION. The outcomes of patients with early breast cancer have improved with the use of adjuvant systemic treatments 1, which include chemotherapy, endocrine therapy, and targeted agents (trastuzumab) for eligible subgroups of patients.

Hormone Therapy for Breast Cancer - American Cancer Society

Hormone therapy is a form of systemic therapy, meaning it reaches cancer cells almost anywhere in the body and not just in the breast. It's recommended for women with hormone receptor-positive (ER-positive and/or PR-positive) breast cancers, and it does not help women whose tumors are hormone receptor-negative (both ER- and PR-negative).

Hormonal Therapy for Early-Stage Hormone Receptor-Positive ...

Hormonal therapy, also called endocrine therapy, for hormone receptor-positive breast cancer is an adjuvant therapy. Adjuvant therapy is treatment given after surgery, chemotherapy, and/or radiation therapy to lower the chance of the cancer coming back.
