Within the three socio-physical spatialities of food - fields, bodies and markets - the collection reveals how race and food are intricately linked. An international and multidisciplinary team of scholars complements each other to shed light on how human groups become entrenched in myriad hierarchies through food, at scales from the dining room and market stall to the slave trade and empire

Book Review: Geographies of Race and Food: Fields, Bodies ...

As a contribution to the study of both food and race, it certainly achieves its goal of broadening both fields, bringing an anti-racist perspective to food scholarship, and deepening our understanding of how race is constituted in ways which are not always obvious. While aimed at an academic readership, the rich empirical data in the chapters, and highly topical subject matter may also appeal to a non-specialist audience.
