POLYNOMIAL SPLINE INTERPOLATION AND TWO-POINT BOUNDARY ...

POLYNOMIAL SPLINE INTERPOLATION AND TWO-POINT BOUNDARY VALUE PROBLEMS By anabu Sakai* (Received Sep. 4, 1979) Polynomial splines are employed, experimentally, to approximate to the solution of a simple two-point boundary value problem for a nonlinear ordinary differential equation. Checked by comparison with the analytical solution, the results are encouraging. 1. Introduction and

Solution of Nonlinear Initial-Boundary Value Problems by ...

The three problems which have been stated above have to be regarded as examples of nonlinear initial-boundary value problems which can be solved using sine type interpolation approximations. Besides the examples which will be given in this paper, some further developments are in progress for nonlinear problems in fluid dynamics [11]. 3. SOLUTION SCHEMES This section provides the description of

Boundary Value Problems - University of Utah

Boundary Value Problems Auxiliary conditions are specified at the boundaries (not just a one point like in initial value problems) $T(0) = T(1) = T(x)$ $T(0) = T(1) = x \times 1$ Two Methods: Shooting Method Finite Difference Method conditions are specified at different values of the independent variable! Shooting Method Applicable to both linear & non-linear Boundary Value (BV) problems. Easy to
