Notch signaling pathway - Wikipedia

The Notch signaling pathway is a highly conserved cell signaling system present in most multicellular organisms. Mammals possess four different notch receptors, referred to as NOTCH1, NOTCH2, NOTCH3, and NOTCH4. The notch receptor is a single-pass transmembrane receptor protein.

Notch Signaling Interactive Pathway | Cell Signaling ...

Pathway Description: Notch signaling is an evolutionarily conserved pathway in multicellular organisms that regulates cell-fate determination during development and maintains adult tissue homeostasis.

Notch-Signalweg - DocCheck Flexikon

Der Notch-Signalweg ist nach seinem Rezeptor "Notch" benannt. Dieser Signalweg erm glicht die Zell-Zell-Kommunikation benachbarter Zellen durch die Interaktion zwischen dem Notch-Rezeptor auf der Oberfl che einer Zelle und dessen membranst ndigen Liganden "Delta" oder "Jagged" auf der Oberfl che der anderen Zelle.

Notch-Signalweg Wikipedia

Der Notch-Signalweg ist ein weit verbreiteter und stark konservierter Signaltransduktionsweg, durch den Zellen auf u ere Signale reagieren k nnen. Der Signalweg ist nach seinem Rezeptor Notch benannt, welcher den membranst ndigen Liganden Delta auf der Oberfl che einer anderen Zelle bindet.

Notch Signaling Pathway - news-medical.net

Notch signalling is involved in the cell-cell communication process via influencing the patterns of gene expression and differentiation. Notch pathway maintains stem cell populations and regulates notch1a notch 1a [(zebrafish)]

Notch signalling maintains blastema cells in a plastic, undifferentiated and proliferative state, an essential requirement for fin regeneration. Notch signaling activity maintains blastemal cells in a proliferative state and thus coordinates proliferation with differentiation during regenerative growth.
