Fish Nutrition | ScienceDirect

This third edition of *Fish Nutrition* is a comprehensive treatise on nutrient requirements and metabolism in major species of fish used in aquaculture or scientific experiments. It covers nutrients required and used in cold water, warm water, fresh water, and marine species for growth and reproduction. It also highlights basic physiology and biochemistry of the nutrients and applications of

WHO | Dietary recommendations / Nutritional requirements

Preparation and use of food-based dietary guidelines (WHO/FAO), WHO, Geneva 1996; Carbohydrates in human nutrition (FAO/WHO), FAO, Rome 1998;

Forthcoming outputs. During the 1980s WHO and FAO reviewed the requirements for protein, energy, vitamin A, folate, iron, and several other vitamins and minerals. With regard to vitamins and minerals, there is enough new research to once again justify updating our information on the subject.
